SKILLS

Frontend: HTML , CSS , JAVASCRIPT , REACT JS , NEXT JS , TAILWINDCSS

Backend: NODE JS , EXPRESS JS , PHP , LARAVEL

Database: MYSQL , MONGODB , POSTGRESQL

Others: GIT&GITHUB , DOCKER

WORK EXPERIENCE

E - P R A B I D H I – full Stack Developer

Jun 2022 - current

- Developed and maintained multiple web applications using React, Node js, PHP, and MySQL, ensuring high performance and scalability.
- Built RESTFULL APIs and integrated frontend–backend workflows to deliver smooth user experience and reliable system functionality.
- Collaborated with cross-functional teams to gather requirements, design features, and deliver projects within deadlines.

Projects

Mero geet ([link](#)) : Developed a full-stack music streaming platform with user authentication (login/signup), advanced song search, playlist creation, and artist onboarding using the MERN stack (MongoDB, Express, React, Node.js) .Implemented artist module enabling verified artists to upload, manage, and publish songs, using ImageKit for optimized storage and fast delivery of images and audio files. Built scalable backend APIs for music streaming, playlist management, user profiles, and artist features, focusing on performance, secure JWT-based authentication, and seamless UI/UX on the frontend.

Chat app ([link](#)) : Built a full-stack real-time chat application enabling users to sign up, log in, add friends, and communicate through one-to-one and group chats with instant message delivery. Implemented rich messaging features including text, file sharing, images, audio, and video support, along with real-time typing indicators and read receipts.

EDUCATION

Tribhuvan University - Bachelor of Computer Application

Sep 2022 – current
